BIOGRAPHY

A passionate programmer and problem solver with four months of trainee experience in development and 3 years+ in problem-solving. Creating a website with a usable and clean user interface experience is my goal. I am self-driven and hungry to learn new technologies and strategies in this rapidly changing industry. I know the importance of creating highly readable and easily maintainable source code. So my main focus is to maintain proper guidelines and architecture while developing the website. I always try to improve my coding style by getting up to date with the new updates in the development environment. While working with an already existing website try to update it with more efficient code so that users get full performance. Strong eye for detail and tenacity to never quit on something until it is absolutely perfect.

EXPERIENCE

Jul 2022 - Continuing	Software Engineer Trainee Brain Station 23 Limited
Jun 2021 - Sep 2021	Research Intern North South University
